The index covers the US investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis.

**Bloomberg Barclays U.S. Credit Index** - The US Credit component of the U.S. Government/Credit Index. This index consists of publically-issued U.S. corporate and specified foreign debentures and secured notes that meet the specified maturity, liquidity, and quality requirements. To qualify, bonds must be SEC-registered. The US Credit Index is the same as the former US Corporate Investment Grade Index.

**Bloomberg Barclays U.S. High Yield Index** - An index that covers the universe of fixed rate, non-investment grade debt. Eurobonds and debt issuer from countries designated as emerging markets (e.g. Argentina, Brazil, Venezuela, etc.) are excluded, but Canadian and global bonds (SEC registered) of issuers in non-EMG countries are included. Original issue zeros, step-up coupon structures, 144-As and pay-in-kind (PIK, as of October 1, 2009) are also included.

**Bloomberg Barclays Municipal Bond Index** - An index that is representative of the broad market for investment grade, tax-exempt bonds with a maturity of at least one year.

Roll period typically occurs from 6th-10th business day based on the roll schedule.

**Consumer Price Index** - A measure that examines the weighted average of prices of a basket of consumer goods and services, such as transportation, food and medical care.
