- (a) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional buyers.
- (b) Value determined using significant unobservable inputs.
- (c) Security pays interest at rates that represent residual cashflows available after more senior tranches have been paid. The interest rate disclosed reflects the estimated rate in effect as of period end.
- (d) Coupon rate is variable or floats based on components including but not limited to reference rate and spread. These securities may not indicate a reference rate and/or spread in their description. The rate disclosed is as of period end.
- (e) Step Bond; Coupon rate changes based on a predetermined schedule or event. The interest rate shown is the rate in effect as of period end.
- (f) Security is in default or has failed to make a scheduled payment. Income is not being accrued.
- (g) Perpetual maturity. The date disclosed is the next call date of the security.
- (h) Coupon rate is variable based on the weighted average coupon of the underlying collateral. To the extent the weighted average coupon of the underlying assets which comprise the collateral increases or decreases, the coupon rate of this security will increase or decrease correspondingly. The rate disclosed is as of period end.
- Security, or portion of security is on loan as of period end pursuant to the Liquidity Agreement.
- (j) Interest only security
- (k) Inverse floating rate security whose interest rate moves in the opposite direction of reference interest rates. Reference interest rates are typically based on a negative multiplier or slope. Interest rate may also be subject to a cap or floor.
- (1) Non-income producing security
- (m) Represents less than 0.05% of net assets
- (n) Seven-day yield as of period end
- (o) Under the Fund's Liquidity Agreement, the lender, through its agent, has been granted a security interest in substantially all of the Fund's investments in consideration of the Fund's borrowings under the line of credit with the lender.
- PIK A payment-in-kind security in which the issuer may make interest or dividend payments in cash or additional securities. These additional securities generally have the same terms as the original holdings.

### FUTURES CONTRACTS

Description	Long/Short	Contract Quantity	Expiration Date	Notional Amount <sup>(1)</sup>	Unrealized Appreciation (Depreciation)/ Value
US Treasury Ultra Long Bond Future	Long	300	03/19/2024	\$40,078,125	\$3,613,397
10-Year US Treasury Ultra Note Future	Long	660	03/19/2024	77,890,313	3,372,895
					\$6,986,292

<sup>(1)</sup> Notional Amount is determined based on the number of contracts multiplied by the contract size and the quoted daily settlement price in US dollars.

#### 1. Organization

DoubleLine Income Solutions Fund (the "Fund") was formed as a closed-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"), and originally classified as a non-diversified fund. The Fund is currently operating as a diversified fund. Currently under the 1940 Act, a diversified fund generally may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of any one issuer or own more than 10% of the outstanding voting securities of such issuer (except, in each case, U.S. Government securities, cash, cash items and the securities of other investment companies). The remaining 25% of a fund's total assets is not subject to this limitation. The Fund was organized as a Massachusetts business trust on January 10, 2013 and commenced operations on April 26, 2013. The Fund is listed on the New York Stock Exchange ("NYSE") under the symbol "DSL". The Fund's primary investment objective is to seek high current income and its secondary objective is to seek capital appreciation.

#### 2. Significant Accounting Policies

The Fund is an investment company that applies the accounting and reporting guidance issued in Topic 946, *Financial Services—Investment Companies*, by the Financial Accounting Standards Board ("FASB"). The following is a summary of the significant accounting policies of the Fund. These policies are in conformity with accounting principles generally accepted in the United States of America ("US GAAP").

A. Security Valuation. The Fund has adopted US GAAP fair value accounting standards which establish a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

- Level 1—Unadjusted quoted market prices in active markets for identical securities
- · Level 2—Quoted prices for identical or similar assets in markets that are not active, or inputs derived from observable market data
- Level 3—Significant unobservable inputs (including the reporting entity's estimates and assumptions)

Valuations for domestic and foreign fixed income securities are normally determined on the basis of evaluations provided by independent pricing services. Vendors typically value such securities based on one or more inputs described in the following table which is not intended to be a complete list. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed income securities in which the Fund is authorized to invest. However, these classifications are not exclusive, and any of the inputs may be used to value any other class of fixed-income securities. Securities that use similar valuation techniques and inputs as described in the following table are categorized as Level 2 of the fair value hierarchy. To the extent the significant inputs are unobservable, the values generally would be categorized as Level 3. Assets and liabilities may be transferred between levels.

Fixed-income class	Examples of Inputs
All	Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and other reference data (collectively referred to as "standard inputs")
Corporate bonds and notes; convertible securities	Standard inputs and underlying equity of the issuer
US bonds and notes of government and government agencies	Standard inputs
Residential and commercial mortgage-backed obligations; asset-backed obligations (including collateralized loan	Standard inputs and cash flows, prepayment information, default rates, delinquency and loss assumptions, collateral characteristics, credit enhancements
obligations)	and specific deal information, trustee reports
Bank loans	Standard inputs

Investments in registered open-end management investment companies will be valued based upon the net asset value ("NAV") of such investments and are categorized as Level 1 of the fair value hierarchy.

Common stocks, exchange-traded funds and financial derivative instruments, such as futures contracts or options contracts, that are traded on a national securities or commodities exchange, are typically valued at the last reported sales price, in the case of common stocks and exchange-traded funds, or, in the case of futures contracts or options contracts, the settlement price determined by the relevant exchange. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy. Due to custodian as recorded on the Statement of Assets and Liabilities is recorded at cost and approximates fair value; it is classified as level 2 under the fair value hierarchy.

Over-the-counter financial derivative instruments, such as forward currency exchange contracts, options contracts, or swap agreements, derive their values from underlying asset prices, indices, reference rates, other inputs or a combination of these factors. These instruments are normally valued on the basis of valuations obtained from counterparties, published index closing levels or evaluated prices supplied by independent pricing services, some or all of which may be based on market data from trading on exchanges that closed significantly before the time as of which the Fund calculates its NAV. Forward foreign currency contracts are generally valued based on rates provided by independent data providers. Exchange

traded futures and options on futures are generally valued at the settlement price determined by the relevant exchange on which they principally trade, and exchange traded options are generally valued at the last trade price on the exchange on which they principally trade. The Fund does not normally take into account trading, clearances or settlements that take place after the close of the principal exchange or market on which such securities are traded. Depending on the instrument and the terms of the transaction, the value of the derivative instruments can be estimated by a pricing service provider using a series of techniques, such as simulation pricing models. The pricing models use issuer details and other inputs that are observed from actively quoted markets such as indices, spreads, interest rates, curves, dividends and exchange rates. Derivatives that use similar valuation techniques and inputs as described above are normally categorized as Level 2 of the fair value hierarchy.

The Fund's holdings in whole loans, securitizations and certain other types of alternative lending-related instruments may be valued based on prices provided by a third-party pricing service.

Senior secured floating rate loans for which an active secondary market exists to a reliable degree will be valued at the mean of the last available bid/ask prices in the market for such loans, as provided by an independent pricing service. Where an active secondary market does not exist to a reliable degree in the judgment of DoubleLine Capital LP (the "Adviser" or "DoubleLine Capital"), such loans will be valued at fair value based on certain factors.

In respect of certain commercial real estate-related, residential real estate-related and certain other investments for which a limited market may exist, the Valuation Designee (as defined below) may value such investments based on appraisals conducted by an independent valuation advisor or a similar pricing agent. However, an independent valuation firm may not be retained to undertake an evaluation of an asset unless the NAV, market price and other aspects of an investment exceed certain significance thresholds.

The Board of Trustees has adopted a pricing and valuation policy for use by the Fund and its Valuation Designee in calculating the Fund's NAV. Pursuant to Rule 2a-5 under the 1940 Act, the Fund has designated the Adviser as its "Valuation Designee" to perform all of the fair value determinations as well as to perform all of the responsibilities that may be performed by the Valuation Designee in accordance with Rule 2a-5. The Valuation Designee is authorized to make all necessary determinations of the fair values of portfolio securities and other assets for which market quotations are not readily available or if it is deemed that the prices obtained from brokers and dealers or independent pricing services are unreliable.

The following is a summary of the fair valuations according to the inputs used to value the Fund's investments as of December 31, 2023:

<sup>(</sup>a) Purchases include all purchases of securities, payups and corporate actions.

<sup>(</sup>b) Sales include all sales of securities, maturities, and paydowns.

<sup>(</sup>c) Any difference between Net Change in Unrealized Appreciation (Depreciation) and Net Change in Unrealized Appreciation (Depreciation) on securities held at December 31, 2023 may be due to a security that was not held or categorized as Level 3 at either period end.

<sup>(</sup>d) Transfers into or out of Level 3 can be attributed to changes in the availability of pricing sources and/or in the observability of significant inputs used to measure the fair value of those instruments.

The following is a summary of quantitative information about Level 3 Fair Value Measurements:

Fair Value as of Valuation Unobservable **Unobservable Input Values** Impact to valuation from December 31, Techniques (Weighted Average)(e) 2023 Input an increase to input \$54,757,837 \$0.01 - \$86.18 (\$66.57) Significant changes in the market Non-Agency Commercial Market Market Quotes Mortgage Backed Obligations Comparables quotes would have resulted in direct and proportional changes in the fair value of the security Collateralized Loan Obligations \$17,297,048 Market Market Quotes \$0.01 - \$90.18 (\$76.73) Significant changes in the market Comparables quotes would have resulted in direct and proportional changes in the fair value of the security Foreign Corporate Bonds \$ 9,504,998 Market Significant changes in the market Market Quotes \$0.00 - \$109.47 (\$89.53) Comparables quotes would have resulted in direct and proportional changes in the fair value of the security Common Stocks \$ 9,071,569 Market Market Quotes \$0.13 - \$30.00 (\$20.71) Significant changes in the market Comparables quotes would have resulted in direct and proportional changes in the fair value of the security Market EV Multiple 6.45x (6.45x) Significant changes in EV multiple would have resulted in Transaction Approach direct changes in the fair value of the security Comparable EV Multiples 5.40x (5.40x) Significant changes in EV multiples would have resulted in Company Approach direct changes in the fair value of the security Illiquidity 10% (10%) Significant changes in illiquidity Discounts discounts would have resulted in indirect changes in the fair value of the security \$ 4,013,286 Market Quotes Asset Backed Obligations Market \$2.66 - \$1,119.29 (\$577.88) Significant changes in the market Comparables quotes would have resulted in direct and proportional changes in the fair value of the security Rights Market \$ 2,965,538 \$8.88 (\$8.88) Significant changes in the market Market Quotes quotes would have resulted in Comparables direct and proportional changes in the fair value of the security Bank Loans \$ 1,892,798 Market Market Quotes \$100.00 (\$100.00) Significant changes in the market Comparables quotes would have resulted in direct and proportional changes in the fair value of the security Warrants 10,358 Market Market Quotes \$0.38 (\$0.38) Significant changes in the market Comparables quotes would have resulted in direct and proportional changes in the fair value of the security Escrow Notes Income Expected Value \$0.00 (\$0.00) Significant changes in the expected value would have Approach resulted in direct changes in the fair value of the security

<sup>(</sup>e) Unobservable inputs were weighted by the relative fair value of the instruments.
