

DoubleLine Multi-Asset Trend Fund

September 2024 | World Allocation | Tickers: DBMOX/DLMOX

Investment Objective

The Fund's investment objective is to seek total return (capital appreciation and current income) which exceeds the total return of its benchmark index over a full market cycle.

Investment Approach

The Fund will seek to use derivatives, or a combination of derivatives and direct investments, to provide a return, with respect to that portion of the Fund's portfolio (before fees and expenses) that approximates the performance of the BNP Paribas Multi-Asset Trend Index (the "Index"). The Fund will invest in a portfolio of debt securities to seek to provide additional long-term total return.

Investment Philosophy

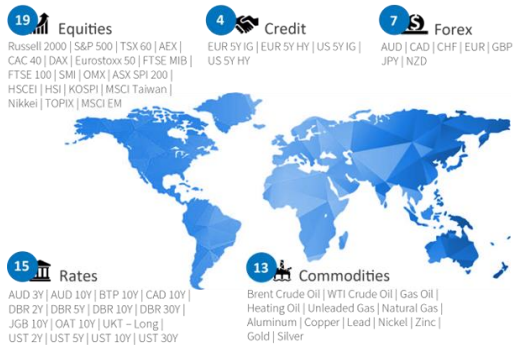

Maintain a core portfolio of debt instruments that focuses on global fixed income sector rotation while simultaneously obtaining exposure to a diverse multi-asset class trend following strategy via the Index. The Index seeks investment exposure to trends in price movements of a broad universe of assets across different markets, including global equities, sovereign bonds and other debt securities, interest rates, currencies and commodities

Broadly Diversified Investment Universe:

58 Underlying Markets

Eligibility criteria:

- Transparent and representative of a market
- Operational effectiveness: utilize futures for leveraging and shorting
- Large markets with significant daily liquidity
- Cost efficiency

¹ The Adviser has contractually agreed to waive fees and reimburse expenses through August 1, 2025.

² The Adviser has contractually agreed to waive fees and reimburse expenses to limit ordinary operating expenses to an amount not to exceed 0.65% for Class I shares and 0.90% for Class N shares. These expense limitations will apply until at least August 1, 2025 except that they may be terminated by the Board of Trustees at any time. Net expense ratios are applicable to investors.

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance current to the most recent month-end may be obtained by calling (213) 633-8200 or by visiting www.doubleline.com.

The performance information shown assumes the reinvestment of all dividends and distributions. Performance for periods greater than one year is annualized.

While the Fund is no-load, management fees and other expenses still apply. Please refer to the prospectus for further details.

The Fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The statutory and summary prospectus contain this and other important information about the investment company, and may be obtained by calling (877) 354-6311 / (877) DLINE11, or visiting www.doubleline.com. Read them carefully before investing.

DoubleLine Multi-Asset Trend Fund

September 2024 | World Allocation | Tickers: DBMOX/DLMOX

Risk Disclosure

Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in lower-rated and non-rated securities present a greater risk of loss to principal and interest than higher-rated securities. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater for investments in emerging markets. The Fund may use leverage which may cause the effect of an increase or decrease in the value of the portfolio securities to be magnified and the Fund to be more volatile than if leverage was not used. Derivatives involve special risks including correlation, counterparty, liquidity, operational, accounting and tax risks. These risks, in certain cases, may be greater than the risks presented by more traditional investments. Investing in ETFs involve additional risks such as the market price of the shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares.

Sector allocations and Fund holdings are subject to change at any time and should not be considered a recommendation to buy or sell any security.

Portfolio holdings generally are made available 30 days after month-end by visiting www.doubleline.com. The source for the information in this report is DoubleLine Capital, which maintains its data on a trade date basis.

Bond Ratings - Grades given to bonds that indicate their credit quality as determined by a private independent rating service such as Standard and Poor's. The firm evaluates a bond issuer's financial strength, or its ability to pay a bond's principal and interest in a timely fashion. Ratings are expressed as letters ranging from 'AAA', which is the highest grade, to 'D', which is the lowest grade. In limited situations when the rating agency has not issued a formal rating, the rating agency will classify the security as not-rated. Investment grade refers to bonds with ratings BBB and higher. Below investment grade refers to bonds with ratings BB and lower.

Credit Distribution - Determined from the highest available credit rating from any Nationally Recognized Statistical Rating Agency ("NRSRO", generally S&P, Moody's and Fitch). DoubleLine chooses to display credit ratings using S&P's rating convention, although the rating itself might be sourced from another NRSRO. In limited situations when the rating agency has not issued a formal rating, the rating agency will classify the security as unrated.

Index Disclosure

BNP Paribas Multi Asset Trend Index – This index is a rules-based index which intends to benefit from trends of a diverse range of asset classes and geographic regions. The 58 underlying components are representative of the following 5 asset classes: equities, rates, commodities, credit and foreign exchange rates. By including a large number of components, the index seeks diversification in both up and down movements. Long and short exposures are identified and adjusted in anticipation of market trends with additional measures built in aiming to limit the effect of risk on performance. The index aims to generate excess return by using a trend following strategy and to offer diversification in a multi-asset class universe.

Credit Suisse Managed Futures Liquid Total Return USD Index – This index seeks to gain broad exposure to the Managed Futures strategy using a pre-defined quantitative methodology to invest in a range of asset classes including: equities, fixed income, commodities and currencies. You cannot invest directly in an index.

Definition of Terms

Agency - Mortgage securities whose principal and interest are effectively guaranteed by the U.S. Government agency including Fannie Mae (FNMA) or Freddie-Mac (FHLMC).

Average Price - The weighted average of the prices of the Fund's portfolio holdings.

Duration - A commonly used measure of the potential volatility of the price of a debt securities, prior to maturity. Securities with a longer duration generally have more volatile prices than securities of comparable quality with a shorter duration.

SEC Yield - A standard yield calculation developed by the U.S. Securities and Exchange Commission (SEC) that allows for fairer comparisons of bond funds. It is based on the most recent 30-day period covered by the fund's filings with the SEC.

Standard Deviation - A measure of the dispersion of a set of data from its mean. The more spread apart the data, the higher the deviation. Calculated by the square-root of the variance.

Weighted Average Life (WAL) - The average number of years for which each dollar of unpaid principal on a loan or mortgage remains outstanding.
